SUMMARY

AI workflow director and self-taught developer experienced in running full AI multi-agent pipelines end-to-end — architecture, content, and QA — acting purely as prompt director rather than hands-on producer. Founder of Nugget Nihongo, a Japanese-learning platform for Indonesian learners whose curriculum is designed on a 747-entry research corpus, and whose exam-preparation track has now carried four candidates through Japan's Specified Skilled Worker Construction exam. Also coordinate recruitment communications and logistics for Japan-bound job candidates, with an earlier background in photography and videography. Bilingual Indonesian–English (IELTS 6.5 equivalent).

EXPERIENCE

Job Matching Assistant Intern — LPK TimeDoor Bali 07/2026 – Present

- Assisting Japanese-language training, scheduling candidate interviews, and document processing for Indonesian applicants entering Japan's Specified Skilled Worker program
- Manage daily communication with candidates and partners — handling inquiries, keeping documentation and schedules consistent across multiple concurrent applicants

Founder & Prompt Director — Nugget Nihongo (Independent Project) 02/2026 – Present

- Founded and directed an offline-first Japanese-learning platform (PWA) covering JLPT N5 to N1 — 2,692 vocabulary and 859 grammar entries, spaced-repetition scheduling, eleven quiz modes and cloud progress sync — built for Indonesian learners at no cost to them
- Ran the entire build as prompt director across a multi-agent AI workflow — architecture, data quality, QA, content, schema migrations, codebase cleanup — entirely from a mobile device, with no formal programming background
- Designed the platform's teaching methodology on a research corpus of 747 audited sources (APA 7th, 43 thematic clusters, roughly 45 percent DOI-verified), compiled and cross-checked through a multi-agent review workflow
- **SSW Konstruksi track** — shipped and live: a React/Vite exam-preparation app with 1,438 bilingual flashcards and 1,075 quiz, exam mockup and simulation questions. Passed the SSW Konstruksi Lifeline & Peralatan exam using it (Apr 2026); three junior candidates I mentored have since passed the same exam on an earlier build — two on 20 Aug 2026 and a third on 24 Aug 2026
- **Anki Deck Series** — shipped: a 1,861-card SSW infrastructure and construction terminology deck, and a 1,031-card Japanese culture deck, each built to a defined taxonomy with example sentences and usage notes
- Paused further platform build-out in Apr 2026 under a personal budget constraint, concentrating remaining resources on the SSW track — the one component with a hard external deadline — rather than spreading them thin across all of it

Food & Beverage Product Trainee — Grand Mercure Yogyakarta 09/2024 – 03/2025

- Prepared ingredients and supported main-course buffet service for 200–700 guests daily at a 5-star hotel; applied HACCP food-safety procedures under Sous Chef & Demi Chef supervision across double shifts

Part-Time — Pangeran Riverside Yogyakarta 09/2024

- Grilled and plated 1,000+ mini beef patties within 5 hours for a wedding catering order, working as part of a coordinated kitchen team

Part-Time — Omah Kopi Cokrowijayan Yogyakarta 08/2024

- Plated appetizers through desserts and prepped ingredients at an à la carte garden café, supporting fast-paced service

Manager — Cerita Hati Coffee & Florist Lumajang 12/2020 – 05/2023

- Led a team of 8 — managing procurement, stock, cashier operations, and daily/monthly accounting — for a café serving up to 300 customers a day across a 6-supplier network

Videographer — Doc.Mentation (freelance collaboration) 2019 – 2021

- Co-ran a two-person videography brand through secondary school — shot, edited and delivered two wedding films, event documentation for paying clients, and school production work

EDUCATION

LPK TimeDoor — Japanese Language, Culture & Workplace Readiness, Bali	10/2025 – 05/2026
Jogja International Culinary Academy — Food & Beverage Product, Yogyakarta	06/2024 – 07/2024
SMA Negeri 1 Lumajang — National High School, East Java	2019 – 2021
SMP Negeri 1 Lumajang — National Middle School, East Java	2016 – 2019

SKILLS

AI & Content: AI Workflow Direction, Prompt Engineering, Multi-Agent Orchestration, Content Pipeline Management, Quality Assurance

Visual: Photography, Cinematography, Videography, Visual Direction

Operations & People: Candidate & Client Communication, Leadership, Cost Management, Stock Management, Multitasking, Teamwork, Time Management

AI Tools: Claude, ChatGPT, Gemini

Software: Google Workspace (Docs, Sheets, Drive, Keep), Microsoft Word, Excel, PowerPoint, Canva; Adobe Premiere Pro, After Effects and Lightroom (basic)

LANGUAGES

Indonesian — Native

English — Proficient (EFSET 66/100, IELTS 6.5 equivalent)

Japanese — JFT A2 (JLPT N4 equivalent)
